Hi David,

Thank you for your quick response.

Unfortunately, I am looking for all the procedures and specifications for the following chemicals in all forms (powders, tablets and injectables):

Morphine Sulfate

Morphine Citrate

Fentanyl

Lorazepam

Versed (Midazolam)

If you can print the information out in advance, that would be great!! I can swing by the lab, when the documents are ready. It would be great opportunity to thank you and your staff for all your assistance.

I understand this request may have added to your other work obligations, but on behalf of this Department, "Thank You."

And if I can be of any assistance to you in the future, please do not hesitate to contact me.

Annie

Annie,

You can send me the specific monograms or procedures you are looking for. The date is printed on the output. If you want the information as close to your use date as possible we can print them when you arrive.

Do you have any particular time you want to pick up the methods?

David

Hi David,

That sounds great!!! I am located in the JP campus.

Let me know if you need anything else for me.

Thank you in advance for assistance and cooperation. Much appreciated!!

Annie

Annie,

MBL currently uses the on-line version of the USP/NF. I am not aware of any hard copies of the current versions of the USP/NS at MBL.

We could open and print a copies of the relevant documents that you can take back to your lab. You can also check for upcoming changed before they become effective in the on-line version. This should give you assurance that you're using the current method for your tests. If you are located in the JP facility this wouldn't be too big an obstacle.

Does this seem like a workable possibility?

Regards,

David

**Subject:** Drug Lab (USP reference book)  
**Importance:** High

Hi,

Michael Mena had recommended me contacting you.

My name is Annie (I use to work with the QC dept) and I currently work for the Dept of Public Health - Drug Lab.

Is it possible to obtain or borrow a current USP reference book from the QC department? I have a series of samples that are being submitted for tampering and I need to obtain the most current testing methods and specifications from USP.

As I discussed with Mike, I could drop by the Lab and take chain of custody of the book or if you can scan these methods and email it me?

Samples are:

Morphine Sulfate - powder, liquid and injectable

Fentanyl - powder, liquid and injectable

Lorazepam - powder, liquid and injectable

Versid (midazolam) – powder, liquid and injectable

Any help would greatly appreciated!!!!

Thanks.

Annie
